

More capacity, less grind.

From order to commitment-ready.

Talos can handle the full search and exam workflow — from order open to commitment data ready for your underwriter or client. Your team stays in control with built-in QC checkpoints at every stage.

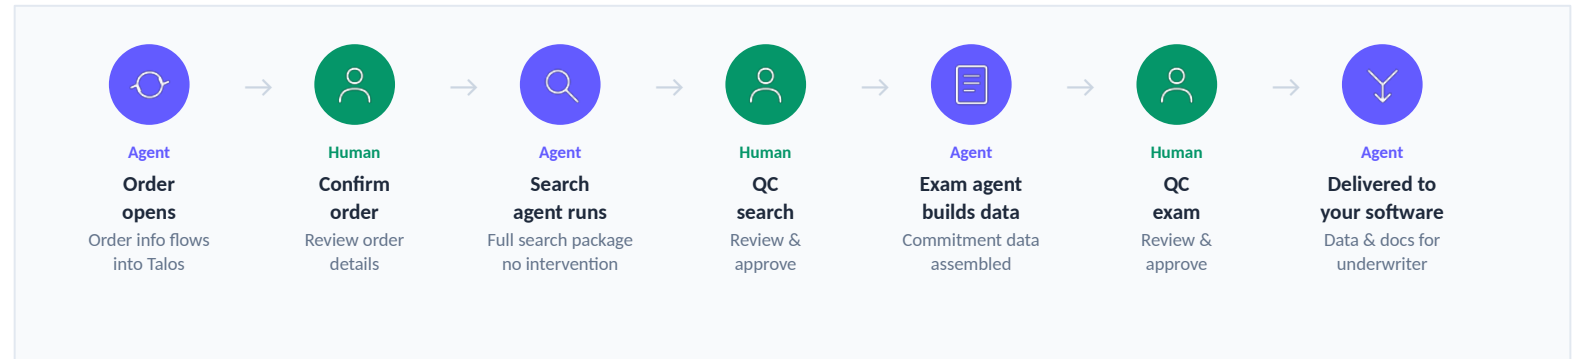

Security & data control

- Data encrypted in transit and at rest
- You control how and when AI is used
- Your data is never shared or used to train models
- Full audit trails on every action

How your Talos team works

Your people stay in control. Your agents do the heavy lifting.

Encode your team's expertise

Your expertise, built in. Explain your regional rules and process like you would to a new hire — Talos adapts to match. No coding, no configuration, just natural language.

What your team can do

Documents in, search package out

Documents classified, organized, and packaged — from any source, your team's way, every time.

Let the agent do the typing

Select legal descriptions and instrument data with a click — no manual transcription.

Legal description compare

Effortlessly compare legal descriptions across multiple conveyances to quickly and clearly identify discrepancies.

Exceptions and requirements surfaced automatically

Talos surfaces Schedule B-I requirements and B-II exceptions automatically — so nothing gets missed during review.

Instantly uncover gaps in chain of title

The Talos format can make gaps, overlaps, and breaks in the chain visible at a glance — nothing hidden in the data.

Signature and stamp detection

Instantly find signatures and stamps with a single click.
